EPSON

ENRICHING LIVES AND HELPING CREATE A BETTER WORLD

EPSON

Perfectly engineered. Down to the smallest details.

Epson is a global technology leader dedicated to becoming indispensable to society by connecting people, things and information with its original, efficient, compact and precision technologies. The company is focused on driving innovations and exceeding customer expectations in inkjet, visual communications, wearables and robotics. Epson is proud of its contributions towards realising a sustainable society and its ongoing efforts in realising the Sustainable Development Goals of the United Nations.

EPSON

LOOKING DEEP WITHIN TO MAKE A GLOBAL IMPACT

At a time when climate change and natural resources are at stake, it takes a strong focus on sustainability to turn things around. The Seiko Epson Corporation has always focused on the environment and sustainability. It has come a long way - from eliminating CFCs in its operations way back in 1993 to recently becoming Japan's first manufacturing company to use 100% renewable energy,* thus reducing CO_2 emissions by 250,000 tonnes.

PRECISIONCORE HEAT FREE

And the efforts are making a difference. From inkjet printers using energy-efficient Heat-Free Technology to streamlining operations in labour-intensive spaces with advanced robots. From preventing ink and water wastage in the fabric industry with digital printers to creating a paper recycler that turns waste paper into new paper, sustainability is ingrained in everything.

EcoTank Printers with the Innovative Heat-Free Technology

Cutting down emissions, going carbon-negative and underground-resource free via compact, efficient and precision technologies is Epson's plan. One that's pivotal to its Environmental Vision 2050.

PLATINUM 2021 ecovadis Sustainability Rating

And that's not all. Epson supports the UN's Sustainable Development Goals (SDGs) and is a member of the Responsible Business Alliance (RBA) - the largest industrial coalition for corporate social responsibility in global supply chains. Epson has also earned a platinum rating for sustainability from EcoVadis of France for the second time—placing it in the top 1% of sustainable companies in the manufacturing industry.

In fact, Epson's focus on sustainability stems from the grassroots. Production of materials, design and packaging. New-age factories running on clean energy. Resource loops closed by minimising product size and weight. Power-saving products with lesser consumables. Use of dry fibre technology and plastic-free materials. All of which are key to sustainability at every step.

Robots for Streamlining Industrial Processes

Monna Lisa Evo Tre – Direct-to-Fabric Digital Industrial Printer

Significant milestones that only motivate Epson to go further in its endeavour—to make sustainability a way of life.

Epson Print Admin

Boost productivity and monitor print usage with a server-based solution that creates a secure printing, scanning and copying environment through user-authentication.

Key Features

Pull printing
Users need ID card-authentication for printing. Printer receives the job from the server post authentication. This reduces leaks and deletes unnecessary prints.

Follow me printing
Users can use any printer in the network. This reduces wait-time as multiple users can print from different printers with authentication.

SMTP and LDAP sync
Users can scan without credentials. Settings need to be made based on scan preferences followed by scanning with authentication. The single-touch feature sends scans to network folders via mail.

Rule-based printing
Rule-based printing helps you set rules according to users and applications. Rules can be set for different needs from colour and span to budgets.

Security
You can secure printing operations by:

- Allowing printing only post authentication
- Deleting unnecessary prints
- Restricting print volumes for each user
- Recording print amounts, functions and outputs

Print and Retain
Users can save print data through settings. Once saved, users can print with a single authentication, without PCs.

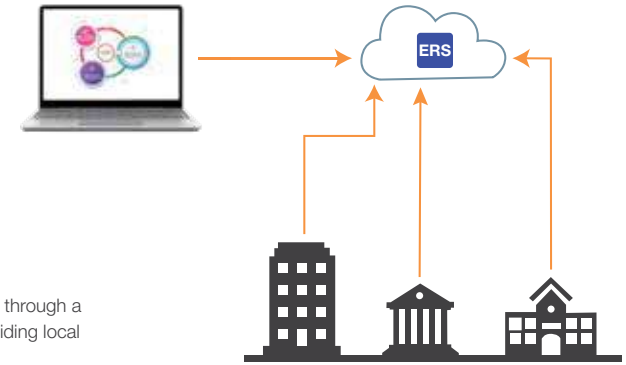
Compatibility
The Epson Print Admin supports all WorkForce printers except WF-100.

rips@eid.epson.co.in

EPSON

Epson Remote Services

Epson Remote Service (ERS) is a free, innovative cloud-based monitoring and management system that delivers advanced remote diagnostics for Epson business products. ERS delivers faster response times, fewer on-site visits, higher first fix rates and is easily accessible from any device with a web browser.



Key Features

Cloud-based
ERS can be accessed from anywhere through a computer, tablet or smartphone – avoiding local server installation and maintenance.

Intuitive user controls
A browser-based tool with an easy-to-use, modular user interface.

Faster fixes
Increased device uptime; Service technicians are armed with the information they need to achieve higher first fix rates.

Reduces downtime
With ERS, a potential breakdown can be avoided with preventive maintenance alerts.

Service support
Helps service engineers to understand the error history of the printer from various LOGs.

Epson Edge Print RIP included
Highest productivity in its class - prints at up to 108.6 $m^2/h^{\wedge}$
High-capacity ink refill packs up to 1 L

lfp@epson-india.in

SureColor™ SC-F9430H (6-colour)

Epson PrecisionCore™ TFP® Printhead Technology

Print resolution of 1440 dpi

Epson's dye-sublimation printer for enhanced colour and brightness

Extreme reliability - uninterrupted production runs with minimal downtime for maintenance

Highest productivity in its class - prints at up to 108.6 $m^2/h^{\wedge}$

High-capacity ink refills up to 1 L

Available with both normal and high-density black ink

SureColor™ SC-F10030 (4-colour)

Four MicroTFP® printheads with 12,800 nozzles

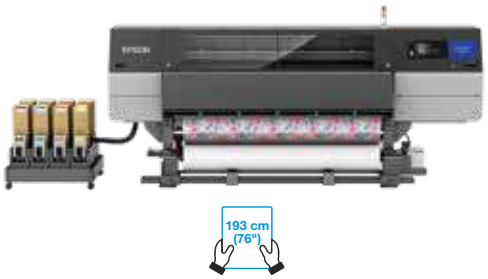
Maximum production of up to 6,120 m^2 per day

High-capacity ink supply system (20 L for each colour)

23 cm (9") touch control panel

High-efficiency dryer to support continuous printing

Built-in RGB camera to perform auto-alignment of PH



SureColor™ SC-F10030H (6-colour)

Four MicroTFP® printheads with 19,200 nozzles

6-colour Epson UltraChrome™ DS ink

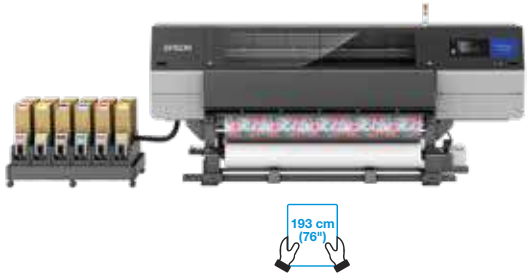
Maximum production of up to 6,120 m^2 per day

High-capacity ink supply system (20 L for each colour)

23 cm (9") touch control panel

High-efficiency dryer to support continuous printing

Built-in RGB camera to perform auto-alignment of PH



EPSON

Direct-to-Fabric/Garment

SureColor™ SC-F1030/F2230

Epson PrecisionCore™ MicroTFP® Printhead Technology

Print resolution of 1200 dpi

New UltraChrome DG2 inks for improved print quality

DTG and DT-Film printing

Auto Gap Adjustment

10.92 cm (4.3") LCD touch panel

New Garment Creator 2 software

SureColor™ SC-F3030

Best-in-quality Direct-to-Garment printer engineered with the revolutionary

Epson PrecisionCore™ MicroTFP® printhead technology

Print a T-shirt in just 27 seconds[3]

Print resolution of 1200 dpi

4-colour (+white) Epson UltraChrome™ DG ink technology

High-speed USB connectivity

10.9 cm (4.3") touchscreen

High production, low maintenance

Prints on cotton, polyester and polycotton blend

Monna Lisa 8000

PrecisionCore™ MicroTFP® printhead
8-colour Epson Genesta inks
Direct-to-fabric printer
Flexible production to print on a wide range of fabrics
Configured with Reactive, Acid, Disperse and Pigment ink
Best-in-class quality and reliability
Prints up to 402 m²/h speed (32-head machine printer at 600 dpi 2-pass)
Available in 1.8 m printing width
Ideal for small run to long run digital printing on fabrics
Blue Sign, GOTS and OEKO-TEX Eco Passport certificates for eco-friendly printing

Monna Lisa Evo Tre 16000

PrecisionCore™ MicroTFP® printhead
8-colour Epson Genesta inks
Direct-to-fabric printer
Flexible production to print on a wide range of fabrics
Configured with Reactive, Acid, Disperse and Pigment ink
Best-in-class quality and reliability
Prints up to 404 m²/h speed (16-head machine printer at 600 dpi 1-pass) /
Prints up to 692 m²/h speed (32-head machine printer at 600 dpi 1-pass)
Available in 1.8 m and 2.4 m printing width
Ideal for small run to long run digital printing on fabrics

Monna Lisa 32000

PrecisionCore™ inkjet technology
8+8 colour channel configurations
Environmentally friendly Genesta Ink
Direct-to-fabric printing
Accurate Belt Position Control (ABPC) technology for precise fabric feeding
Stable print quality with Dynamic Alignment Stabiliser (DAS) technology
Flexible production to print on a wide range of fabrics
Configured with Reactive, Acid, Disperse and Pigment ink
Max print width 1,800 mm (71")
Max printing speed of up to 697 m²/h (32-head machine printer at 600 dpi 1-pass)
Bluesign, GOTS and Eco Passport certificates for eco-friendly printing
Available in 1.8 m, 2.4 m and 3.4 m printing width

lfp@epson-india.in

Monna Lisa 64000

PrecisionCore™ inkjet technology
Environmentally friendly Genesta Ink
Uninterrupted production with 10-litre high-capacity ink cartridges
Stable print quality with Dynamic Alignment Stabiliser (DAS) technology
Accurate Belt Position Control (ABPC) technology for precise fabric feeding
Configured with Reactive, Acid, Disperse and Pigment ink
Max print width 1,800 mm (71")
Printing speed of up to 774 m²/h (64-head machine printer at 600 dpi 2-pass)
Bluesign, GOTS and Eco Passport certificates for eco-friendly printing
Best-in-class quality and reliability
Available in 1.8 m printing width

Digital Label Press

SurePress® L-4733A/AW

Epson SurePress® AQ ink with green and orange
Seven-colour inkjet with white ink for high-quality printing, even on clear and metallic substrates
Prints directly on actual substrate without pre-coating**
Micro Piezo™ multi-printhead array
Automatic colour management
Dual drying system
Built-in rewinder unit
Built-in touchscreen print controller
Optional RIP software

**Supported substrates – Standard self-adhesive label substrate, semi-gloss, gloss and matte paper stock, BOPP, PET, Yupo and pre-laminated film (80 to 320 microns).

SurePress® L-6534VW

Four-colour inkjet press with LED UV curing inks with white ink and digital varnish
50 m/min^ high-speed printing suitable for printing short-run and mid-run jobs
Prints directly on actual substrates
Quick drying UV inks with excellent weather, scratch, chemical and water resistance suitable for labels used in extreme outdoor conditions
Can use substrates of 80 mm ~ 320 mm width
Pinning technology for excellent print quality
Optional RIP software

Retail Projectors

EV-110/115

Resolution – WXGA
White Brightness[a] – 2,200 lumens ISO
Colour Brightness[a] – 2,200 lumens IDMS 15.4
Contrast Ratio – Over 5,000,000:1
Light Source Life – 20,000 hours[c]
Weight – Approx. 5.0 kg
SD card slot and edge blending
Product colour – White (EV-110)/ Black (EV-115)

Manage Your Projectors Effortlessly with Epson Projector Management Connected (EPM-C)

A Cloud-based service that lets you control and monitor multiple projectors in your network.

Monitor

Supervise projectors remotely
Check projector status through a web browser

Notify

Receive warning or error notifications via email
Anticipate on-site issues using error log information

Operate

Remotely control essential functions;
Power ON/OFF, AV mute & input signal switching

WorkForce Document Scanners

Sheet-fed

WorkForce DS-C330

NEW

Maximum resolution of 1200 dpi
Scan speed of up to 30 ppm^ / 60 ipm^ (Simplex/Duplex)
Conveniently portable at 1.8 kg (approx.)
Low power consumption of up to 10 W (Operating Mode)
Document size of up to 215.9 mm x 3048 mm
ADF capacity of up to 20 sheets
Scan volume of up to 5000 pages^ per day

WorkForce DS-C490

NEW

Maximum resolution of 1200 dpi
Scan speed of up to 40 ppm^ / 80 ipm^ (Simplex/Duplex)
Conveniently portable at 1.9 kg (approx.)
Low power consumption of up to 13 W (Operating Mode)
Document size of up to 215.9 mm x 5580 mm
Paper capacity of up to 20 sheets
Scan volume of up to 6,500 pages^ per day

WorkForce DS-530II

Scan resolution of 600 dpi
Scan speeds of up to 35 ppm^/ 70 ipm^ (Simplex/Duplex)
Scan volume of 5,500 pages^ per day
Automatic Document Feeder with a capacity of 50 sheets
Versatile paper handling including stacks of business cards and ID cards, single sheets, extra-long pages and more

WorkForce DS-730N

Scan resolution of 600 dpi
Scan speeds of up to 40 ppm^/80 ipm^ (Simplex/Duplex)
Scan volume of 6,500 pages^ per day
Automatic Document Feeder with a capacity of 100 sheets
Central device and job management and lockable control panel
Intuitive touchscreen controls for easy job processing
Built-in Ethernet and USB

NETWORK

WorkForce DS-770II

Scan resolution of 600 dpi
Scan speeds of up to 45 ppm^/90 ipm^ (Simplex/Duplex)

Print resolution of up to 1200 x 1200 dpi
Print widths of up to 108 mm (4.25")
Auto-cutter function
Print speed of up to 119 mm/sec^
Smudge, fade and water-resistant pigment ink
Prints on plain, matte, glossy and synthetic media

ColorWorks™ C6050P

High-yield 4-colour ink system
Print resolution of up to 1200 x 1200 dpi
Print widths of up to 108 mm (4.25")
Peeler function
Print speed of up to 119 mm/sec^
Smudge, fade and water-resistant pigment ink
Prints on plain, matte, glossy and synthetic media

ColorWorks™ C6550A

High-yield 4-colour ink system
Print resolution of up to 1200 x 1200 dpi
Print width of up to 211 mm (8.3")
Auto-cutter function
Print speed of up to 85 mm/sec^
Smudge, fade and water-resistant pigment ink
Prints on plain, matte, glossy and synthetic media

ColorWorks™ C6550P

High-yield 4-colour ink system
Print resolution of up to 1200 x 1200 dpi
Print width of up to 211 mm (8.3")
Peeler function
Print speed of up to 85 mm/sec^
Smudge, fade and water-resistant pigment ink
Prints on plain, matte, glossy and synthetic media

ColorWorks™ CW-7510G

High-yield 4-colour ink system
Print resolution of 1200 x 600 dpi
Printing width of up to 104 mm (4.1")
Print speed of up to 300 mm/sec^
Smudge, fade and water-resistant pigment ink
Prints on plain, matte, glossy and synthetic media

INDUSTRIAL ROBOTS

The New Rule of Efficiency

SCARA Series
(G Series/RS Series/LS Series/T Series)

High precision and repeatabilities down to +/- 5 microns
Up to 20 kg payloads
175 mm to 1000 mm reach
Super-fast cycle times
High rigidity arm design
Tabletop, ceiling and wall mount
Clean/ESD and wash down models available
Industry-leading reliability

robotinfo@eid.epson.co.in

EPSON

6-axis Robots
(C12/C8/C4/VT)

High precision/repeatability
Up to 12 kg payloads with fast cycles
Reach of 665 mm to 1400 mm
SlimLine body design and compact wrist
Clean/ESD/IP65/IP67 models available
Best-in-class motion range

Robots Integrated Options

Conveyor tracking
Vision guidance
Force sensing
Net support
GUI builder
Security option
Fieldbus I/O

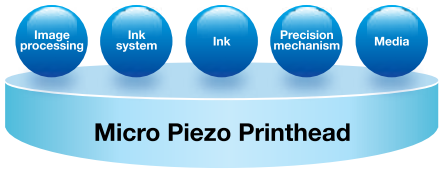
EPSON INNOVATION



Micro Piezo™ Technology

One of Epson's core technologies, the Micro Piezo system, features Epson's unique Micro Piezo™ printheads combined with complementary technologies in image processing, ink systems, ink, media and precision mechanisms such as paper feeders.

Extraordinarily durable, Micro Piezo printheads deliver high image quality by precisely controlling the size and placement of every ink droplet.

3LCD Projection Technology

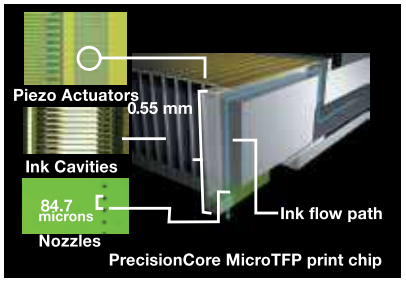
All Epson Projectors are powered by 3LCD technology. The innovative 3-chip design sets itself apart by delivering vibrant, true-to-life images with up to 3 times higher brightness.[5]

3-chip LCD projectors work by splitting white light into red, green and blue. These beams are directed to HTPS panels, to be recombined to form images giving Epson's business and home projectors their characteristic image brightness, natural colours and eye-friendliness.

Epson's Heat-Free Technology

This is the next-generation of inkjet technology. The heart of the technology is an advanced print chip, based on MEMS technology, which uses a 1-micron thin piezo actuator that deposits ink with dramatic speed and precision.

Epson's Heat-Free Technology continues and extends Epson's tradition of providing renowned colour quality and output durability across the widest range of applications, delivering high-speed solutions for commercial, industrial and office printing.



Microdisplay Technology

Epson's microdisplay technology encompasses micro-fabricated HTPS panels (high-temperature polysilicon TFT liquid crystal panels), optical design and manufacturing technology. Forming the heart of Epson LCD projectors, this is the technology that has enabled Epson to stay on top in the global market for 21 consecutive years.

Robotics Technology

Epson's robotics technology traces its roots back to 1983, when the company developed its first precision assembly robots for use in watch production. Epson's robots are used in the electronics, automotive, food, and medical industries, to name a few.

Our precision control technology allows Epson's robots to be compact, lightweight and slim, thus giving them superior productivity per unit of area.
